for

Karriker, Wanda. (2008, April). *Child Sexual Abuse and Beyond: Findings From a Series of International Extreme Abuse Surveys.* Paper presented at the Fourteenth Annual Northern California Child Sexual Abuse Awareness Conference: Sacramento, CA.

Karriker, Wanda. (2008, April). *Incest: The Ultimate Betrayal: Findings From a Series of International Extreme Abuse Surveys.* Paper presented at the Fourteenth Annual Northern California Child Sexual Abuse Awareness Conference: Davis, CA.

In 2007, more than 2,000 persons representing at least 40 countries and 31 primary languages participated in a series of online **E**xtreme **A**buse **S**urveys offered in English and German:

- (1) **EAS** for adult survivors of extreme abuse including, but not limited to, ritual abuse and/or mind control (RA/MC).
- (2) **P-EAS** for professionals who work with survivors.
- (3) **C-EAS** for caregivers of children who have disclosed experiences consistent with ritual abuse and/or mind control

The anonymous surveys were conducted privately by Thorsten Becker, Wanda Karriker, Bettina Overkamp, and Carol Rutz under the legal responsibility of S.P.ORG.-Consulting e.V., a non-governmental organization in Germany.

Thorsten Becker is a social worker and freelancing supervisor from Germany. In his work as a cult counselor, he has served as case consultant in several suspected cult-related investigations in Europe. In 1994, he received the "German Child Protection Award" for his team's work with ritually abused children.

Wanda Karriker, Ph.D. is a retired psychologist from the United States. She wrote a novel, *Morning, Come Quickly*, to share what she has learned both personally and professionally about the aftereffects of extreme child abuse and the resiliency of the human spirit.

Bettina Overkamp, Ph.D. is a psychologist who works in a trauma ambulance in a psychiatric clinic in Germany. She is a specialist in diagnostic issues and a member of the Executive Board of the European Society for Trauma and Dissociation (ESTD).

Carol Rutz, author of A Nation Betrayed: The Chilling True Story of Secret Cold War Experiments Performed on Our Children and Other Innocent People, is a healed ritual abuse/mind control survivor from the United States who works at endeavors which provide validation and healing for the survivor community.

Countries of Residence and Primary Languages for Survey Participants

Extreme Abuse Survey (EAS) for Adult Survivors

(An International Online Survey for Adult Survivors of Extreme Abuse)
January 1 – March 31, 2007

2337 persons viewed the survey; 1719 in English, 618 in German.

1471 persons answered at least one question on the survey.

31 countries were declared: United States (774); Germany (273); United Kingdom (92); Canada (75); Australia (38); Switzerland (13); Israel (11); Norway (10); Netherlands (8); Austria (8); New Zealand (6); South Africa (6); Greece (5); Sweden (4); Armenia (3); India (3); Spain (2); France (2); Colombia (2); Belgium (1); Bulgaria (1); Czech Republic (1); Ireland (1); Italy (1); Romania (1); China (1); Hong Kong (1); Kyrgzstan (1); Mexico (1); Malaysia (1); Saudi Arabia (1)

124 respondents did not name a country of residence.

1190 respondents gave their primary languages: English (852); German (256); Dutch (21); Norwegian (10); Hebrew (6); French (6); Greek (5); Swedish (4); Italian (3); Spanish (3); Afrikaans (3); Polish (3); Turkish (2); Estonian (2); Tamil (2); Chinese Simplified (2); Romanian (1); Azerbaijani (1); Bengali (1); Georgian (1); Czech (1); Finnish (1); Korean (1); Persian (1); Armenian (1); Pashto (1)

281 respondents did not name their primary languages.

Professional - Extreme Abuse Survey (P-EAS)

(An International Online Survey for Therapists, Counselors, Clergy and Other Persons Who Have Worked Professionally With At Least One Adult Survivor of Extreme Abuse) April 1, 2007 – June 30, 2007

656 persons viewed the survey; 458 in English, 198 in German.

451 persons answered at least one question on the survey.

20 countries were declared: United States (205); Germany (99); United Kingdom (59); Canada (21); Netherlands (9); New Zealand (4); Switzerland (4); Norway (4); Israel (4); Australia (3); Greece (3); Ireland (2); Philippines (2); Belgium (1); Italy (1); Romania (1); Sweden (1); South Africa (1); Ecuador (1); Hungary (1).

24 respondents did not name a country of residence.

389 respondents gave their primary languages: English (265); Germany (88); Dutch (18); Greek (4); Norwegian (4); Filipino (2); Spanish (2); Hebrew (2); Romanian (1); Hungarian (1); Italian (1); Swedish (1).

62 respondents did not name their primary languages.

Child - Extreme Abuse Survey (C-EAS)

(An International Online Survey for Caregivers of Child Survivors of Ritual Abuse and Mind Control)

July 8, 2007 – October 8, 2007

395 persons viewed the survey; 262 in English, 133 in German.

264 persons answered at least one question on the survey.

19 countries were declared: United States (116); Germany (67); UK (24); Canada (12); Armenia (4); New Zealand (3); France (2); Australia (2); Netherlands (2); Peru (1); Philippines (1); Poland (1); Portugal (1); Switzerland (1); Hungary (1); Israel (1); Venezuela (1); South Africa (1).

22 respondents did not name a country of residence.

222 respondents gave their primary languages: English (148); German (57); Dutch (6); Spanish (4); Faroese (1); Polish (1); Amharic (1); Hungarian (1); Armenian (1); Afrikaans (1); Frisian (1).

42 respondents did not name their primary languages.

Frequencies of Reports of Dissociative Identity Disorder (DID)

EAS: 84% of respondents who identify as RA/MC survivors have met the diagnostic criteria for Dissociative Identity Disorder (DID).

P-EAS: 85% of professionals who answered the question answered "yes" to "The majority of adult RA/MC survivors with whom I have worked have met the diagnostic criteria for (DID)."

C-EAS: 84% of caregivers who answered the question answered "yes" to "Child dissociates when talking or questioned about abuse."

74% of caregivers who answered the question said at least one of the children in their care had received a diagnosis of DID.

Comparison of Response Rates on 10 Identical Items on the EAS and P-EAS and 10 Similar Items on the C-EAS

Listed below are frequencies of responses by extreme abuse survivors who reported each memory, professionals who have worked with at least one survivor reporting the memory, and caregivers of at least one child survivor of RA/MC who has made a verbal disclosure of the crime.

 \underline{N} is total number who answered the question followed by the percent of "yes" responses to each statement by each group.

EA	S	P-E	AS	C-E	AS	
<u>N</u>	<u>%</u>	<u>N</u>	<u>%</u>	<u>N</u>	<u>%</u>	
1093	88%	216	97%	90	82%	Receiving physical abuse from perpetrators.
1090	82%	217	95%	91	77%	Sexual abuse by multiple perpetrators.
1077	73%	221	88%	88	70%	Forced drugging.
1057	56%	218	77%	96	43%	Witnessing murder by perpetrators.
1059	55%	218	78%	92	59%	Forced to participate in animal mutilations/killings.
1059	55%	220	82%	83	53%	Pornography (child).
1040	48%	220	70%	90	42%	Forced participation in murder by perpetrators.
1045	48%	218	77%	79	25%	Prostitution (child).
1041	40%	220	71%	82	33%	Forced impregnation.
1021	26%	217	55%	82	18%	Survivor's own child murdered by his/her perpetrators

A comparison of these distributions suggests that the main difference in responses across groups is the higher percentages of "yes" responses by professionals. This is a reasonable conclusion given that the majority of P-EAS respondents report having worked with more than one survivor of RA/MC and thus would have more opportunities to hear reports of these crimes against children.

Corroboration for Ritual Abuse/Mind Control (RA/MC) Crimes - EAS

Impulse control problems

Self-selected Category of Abuse That Best Describes EAS Respondents' Experiences

N = 987

Selected Responses from the EAS

(N = Total # Who Answered Question; % = Frequency of "Yes" Responses)

		N	% "Yes"
•	My memories of abuse include incest.	1122	70%
•	I had memories of incest before I sought therapy/counseling.	985	64%
•	I was ritually abused in a satanic cult.*	986	55%
•	I had memories of ritual abuse before I sought therapy/counseling.	977	48%
•	Secret government-sponsored mind control experiments were		
	performed on me as a child.	1000	26%
•	I have been diagnosed with dissociative identity disorder (DID or MPD).	1007	65%
•	I am a therapist/counselor/clergy for RA/MC survivors.	965	10%

^{*}Of the 257 EAS respondents who reported that secret mind control experiments were used on them as children, 69% (177) reported having been abused in a satanic cult. Of the 543 respondents who reported that they had been abused in a satanic cult, 33% (179) reported having been used in secret mind control experiments as children.
